STATINTL MEMORANDUM FOR: [REDACTED]

STATINTL SUBJECT : Meeting with [REDACTED] re ADP Inventory Report

STATINTL

STATINTL

1. I discussed the ADP Inventory Report with [REDACTED] today.

2. He asked about the 490 and the 7090. I wrote a note in his office for him in which I stated that one installed computer, the 490, and one contemplated computer, the 7090, were not contained in the inventory. The 490 because it was classified and the 7090 because it was not at all certain at this time that it would be ordered.

3. I gave him the rental of the 490 as \$364,884.00 per year and the estimated rental of the 7090 as \$1,100,000.00 per year.

4. John made the remark that the Air Force is bidding to do the job that DD/R contemplates.

5. John also would like a brief description of the 1401, 1410, 490, and 501. I told him we would work up a brief statement.

6. There is additional evidence that we should brief top management on the use of computers, what they can do and what they cannot do. John would like to see this materialize.

7. I asked John about the status of the Budget Preparation and Control job via machines. He called [REDACTED] and asked him to put some pressure on whomever was working on the plans. John is very anxious to get a machine procedure into being.

who?

whole team?
